FEDERAL FACILITIES COMPLIANCE AGREEMENT (FFCA) - ITEM F OF CLEAN
AIR ACTION SECTION - FEED MATERIALS PRODUCTION CENTER (FMPC)

Dear Mr. Franz:

Reference is made to your May 12, 1987 letter to me regarding the
above subject.

Your general concern with the FMPC Air Monitoring Stations (AMS)
following EPA siting criteria in 40 CFR 58 has been reviewed.
Discussions have been held with both USEPA-5 and Ohio EPA staff
during previous meetings at the FMPC. As a result, the air
monitoring network around the FMPC has been re-evaluated to
assure that representative concentrations of air pollutants can
be measured.

The reevaluation has been completed, and a need exists to raise
all the FMPC AMS up to two (2) meters above ground level to meet
the EPA siting criteria. This work should be completed by
February 1988. Some of the AMS are near the roadway because the
FMPC fenceline is near the road, and it is our desire to measure
the different air parameters at the locations where the public
has closest access.

We will keep you advised of our progress in upgrading the AMS.

Sincerely,

James A. Reafsnider
